

## What's My Sound?

### Directions to make the project:

**Step 1:** Take 10 plastic cups and label each cup with a different vowel sound using a marker. For example: Short a, Long a, Short e, Long e, etc.

**Step 2:** Write a word in each of the spaces on the enclosed sheet. You can use sight basic sight words or spelling words that your child has learned this year.

You can color code the words if you want to make it easier for your child when you first begin. For example: make all the 'a' words blue, all the 'e' words red, etc.

**Step 3:** Cut the word strip apart.

### How To Use The Center

**Step 1:** Place the cups on the table in front of you and your child, keeping the same vowel cups together.

**Step 2:** Have your child read each word card aloud and place the card into the correct cup.

**Step 3:** Continue to add words throughout the year!
